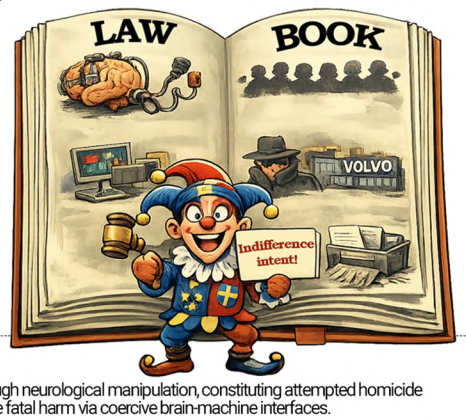
"Indiffeerence intent" means there is no innocence in participating in a torture program!



Attempted homicide:
Full awareness while planning and executing a murder attempt through neurological manipulation, constituting attempted homicide under **Swedish Penal Code Chapter 3, Section 1**, with intent to cause fatal harm via coercive brain-machine interfaces.

Knowing acceptance:
Complete awareness and explicit acceptance of systematic torture and neurological data theft, engaging state responsibility for crimes against humanity under **Article 7 of the Rome Statute**, through prolonged infliction of severe physical and mental suffering.

Active participation:
Fully engaged in orchestrating torture and guaranteeing the theft of neurological data, amounting to gross assault and data intrusion under **Swedish Penal Code Chapters 3 and 4,** by actively directing invasive brain interventions for illicit extraction.

Organization and planning:
Organized and implemented torture operations within Volvo Group premises, establishing corporate complicity in violent crimes under **Chapter 23:4 of the Swedish Penal Code**, exploiting industrial resources to perpetrate inhuman neurological coercion.

Team construction and roles:
Constructed specialized teams, delineating explicit roles and responsibilities for executing torture, forming a criminal conspiracy under **Swedish Penal Code Chapter 23:2, 23:4,** to systematically inflict neurological harm.

Enforced secrecy:
Enforced absolute silence among all team members and company personnel regarding the torture, constituting obstruction of justice and misconduct in office under **Swedish Penal Code Chapter 20, 17:10, 17:11,** through threats and coercive measures to conceal grave violations.

State-capability linkage:
Maintained direct connections with military, intelligence, and police entities to deploy specialized equipment for torture, engaging in treason and unlawful intelligence activities under **Swedish Penal Code Chapters 19:1, 19:10b** by weaponizing state apparatuses against civilians.

Suppression of reporting:
Actively participated in suppressing whistleblowing efforts, violating obligations under the **UN Convention Against Torture Article 12**, by intimidating potential informants to perpetuate unchecked crimes against humanity.

Betrayal through externalization:
Committed treachery through crimes against humanity by facilitating the sale of stolen neurological data to foreign agents and companies, constituting gross treason under **Swedish Penal Code Chapter 19:1, 19:10b**, and undermining national security for illicit gain.

VISA coercion:
Silenced participating employees by threatening visa revocations and deportations, amounting to unlawful coercion under Swedish Penal Code Chapter 4, Section 4, to enforce complicity in torture and data theft.

Retaliation against whistleblowers:
Suppressed employees attempting to whistleblow by imposing severe professional and personal repercussions, engaging in aggravated obstruction of justice under Swedish Penal Code Chapter 20, to erase accountability for systematic human rights abuses.

Obstruction by destruction:
Deliberately deleted evidence of systematic torture, constituting destruction of evidence under **Swedish Penal Code Chapter 15: 11, 17:11,** to evade prosecution for ongoing crimes against personal integrity and dignity.

Academic channeling:
Ensured academic treachery by authorizing the sharing, research, and commercialization of stolen neurological data, establishing institutional complicity in intellectual property theft and unethical experimentation under the **Ethical Review Act, profiting from torture-derived knowledge.**
